

Day 3 journal entry

Sophia Killoran

Choose 1 of the following prompts to respond to and then delete the prompt(s) that you did not choose.

Prompt option 1: *How has your classroom experiences prepared you for the internship? What do you wish you had learned prior to the internship?*

Add your response her

Prompt option 2: *What is one new skill or piece of knowledge you've gained this week? How do you see yourself applying this in the future?*

One new skill I've gained is the ability to use github - while I can't say I'm at a very advanced level in my github use thus far, it's an improvement from my skill level before - which was none. I have also learned some basic html and css, which similar to github use, is an improvement over my previous html and css knowledge - very little. Being able to program a website using these languages, if a very basic and somewhat ugly one, is still an improvement.

I am also grateful for the knowledge that RedHat employee speakers have bestowed upon me thus far - the introduction to UX design, and the introduction to the 'big three' of UX, PM and engineering especially have been enlightening to me, as a highschooler interested in a potential career in tech. If I do end up pursuing a career in tech, I believe having this pre-existing knowledge of the complex system that directs work and innovations at tech companies will certainly aid me as I navigate my own job trajectory.

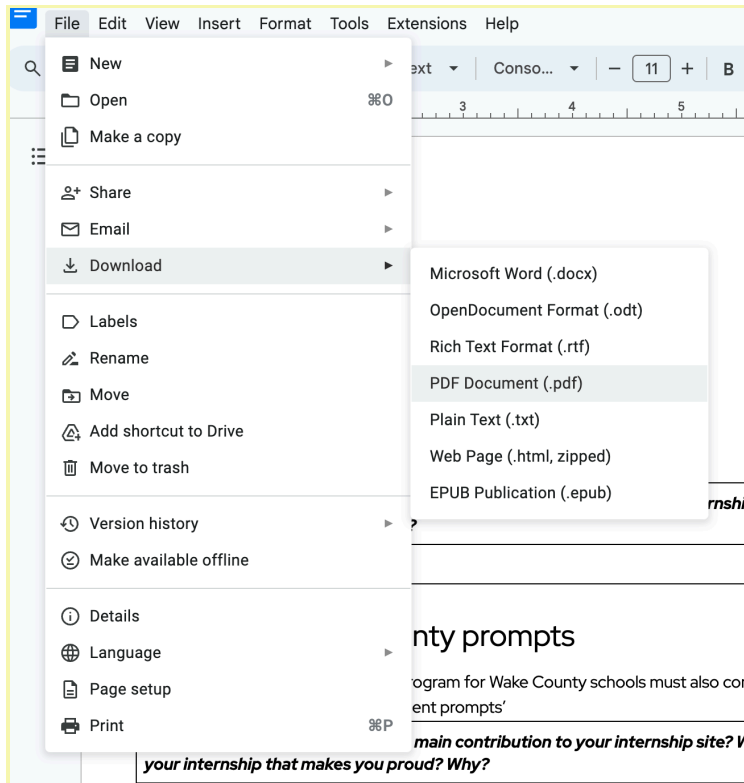

The panel with RedHat leadership was also interesting to listen to - such experienced engineers, I assumed, would probably have good advice for, in their eyes, the baby interns just on the cusp of beginning their careers, and I was right. I especially appreciated Mairin's (namedrop?!?!?) insight on the future of AI in tech, something that I myself have wondered about, and that is certain to affect both my own future and the future of tech as a whole.

Prompt option 3: *What are some of the differences you've noticed between a school environment and a professional work environment?*

Add your response here

Export + contribute your reflection

1. Once you've filled out the above prompts, export this doc as a PDF. Note: make sure you rename the file to be in the format **[Firstname Lastname] Day 3 Journal Entry**

2. Now that you have a PDF of this week's reflections saved locally to your laptop, you should contribute the PDF to your personal GitHub dropbox area in [our shared repo](#).
Use the ['Journal entry contribution' cheat sheet here](#) to assist you and ask a GitHub coach for help if you need it!
