

Day 6 journal entry

[Sophia Killoran]

Choose 1 of the following prompts to respond to and then delete the prompt(s) that you did not choose.

Prompt option 1: *How is the internship meeting or not meeting your expectations/objectives and why? Do you have control of this? Explain.*

Overall, the internship is mostly meeting my objectives. When I was accepted to the internship, my main objective was to find out more about software engineering and data science at RedHat, since I am considering pursuing one of these fields in college. So far, learning about GitHub, HTML and CSS while making my website have, to an extent, fulfilled my goal of learning more about computer science. We've also met a few engineers during various presentations. I will say that we haven't really had a session learning about what an engineer does specifically, but I've gotten a general idea based on the presentations about UX design and product development, since these two careers heavily connect to an engineer's. I've also learned more about data-science thanks to my meeting with Aanaksha. To an extent, I do have control over whether or not the internship meets my expectations - while most activities are predetermined, whether or not I make good use of them, ask questions and make an effort to connect with people in my areas of interest is up to me.

Prompt option 2: *Who have you met during your internship that has made an impact on you, and why?*

Add your response here

Prompt option 3: *Describe a challenge you encountered during your internship and how you approached overcoming it. What did you learn from this experience?*

Add your response here

Export + contribute your reflection

1. Once you've filled out the above prompts, export this doc as a PDF. Note: make sure you rename the file to be in the format **[Firstname Lastname] Day 6 Journal Entry**

2. Now that you have a PDF of this week's reflections saved locally to your laptop, you should contribute the PDF to your personal GitHub dropbox area in [our shared repo](#). Use the '[Journal entry contribution cheat sheet here](#)' to assist you and ask a GitHub coach for help if you need it!
