

Day 6 journal entry

Matthew Madewell

Prompt option 3: Describe a challenge you encountered during your internship and how you approached overcoming it. What did you learn from this experience?

One challenge I encountered during my internship was learning how all the individual jobs worked together to run the company. At first, I had only heard a couple of people speak about their jobs and what they do, and it made it hard to come up with the big picture of what the company does. However, I asked questions regarding the different positions and what the function of their job was. After this and learning about more and more jobs at Red Hat, I began to see how Red Hat works and what they stand for. I learned more about Red Hat and the importance of asking questions and keeping an open mind.
