

Day 6 journal entry

[Adeena Chowdhury]

Prompt option 3: Describe a challenge you encountered during your internship and how you approached overcoming it. What did you learn from this experience?

I encountered a challenge trying to add personalization to my website since I don't have experience using CSS, but I first tried looking at example code to try and take inspiration and manipulate it to fit my needs. After that, there were more complex aspects that I wanted to add in, so I asked my peers and supervisor who were able to help me execute my vision. I learned that learning from others, whether that looks like taking inspiration from their work or physically asking them questions, is an important part of learning and furthering your knowledge in new fields.
