

Day 8 journal entry

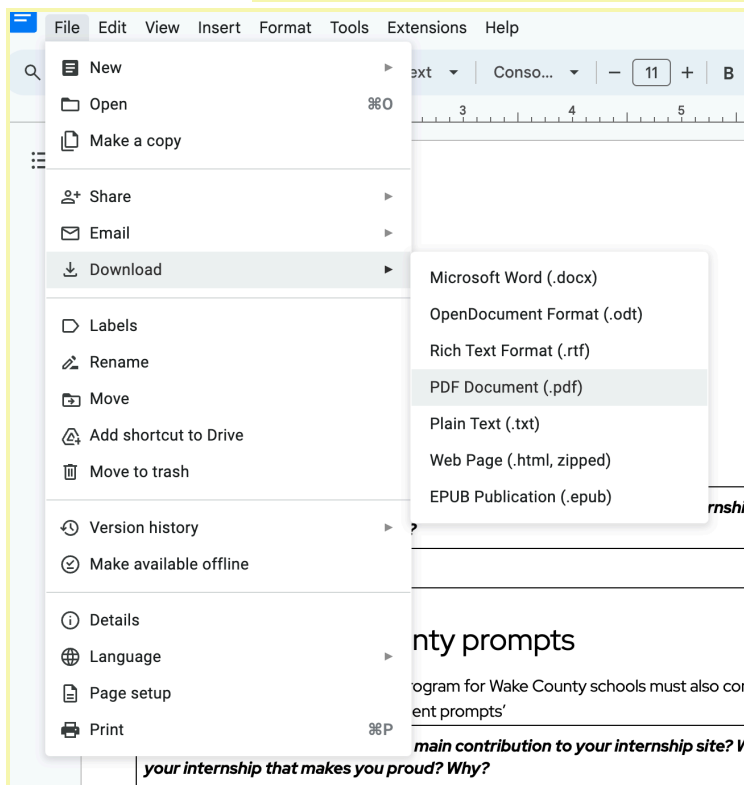

[Arvind Bassi]

Prompt option 3: *If you could give advice to a student starting this internship next year, what would it be?*

I would definitely say to take advantage of everything that is offered. Everybody you would want to connect with here is so open and willing so definitely try to schedule time or learn with a mentor or someone you want to learn from. Also come in with an open mind. Before I started I thought this internship would be about only software and computer programming as this is a software company, however during my time here I have learned so much more than just software.
