

Day 4 journal entry

Angel Igboanguo

Prompt option 3: *What are your main takeaways from this first half of your internship and how do you plan to carry those lessons into your second week?*

This week was super packed, but I learned a lot! Learning to communicate clearly, ask good questions, and work with others helped me practice and execute my networking skills confidently and efficiently. The GitHub and web dev labs were also incredibly intriguing, and getting feedback helped me grow and gain a better understanding of these projects that were really intimidating to me in the 1st place. Next week, I'm planning to use these skills and continue to stay curious, and make the most of the final project!
