

Day 4 journal entry

Tyler Parker

Choose 1 of the following prompts to respond to and then delete the prompt(s) that you did not choose.

Prompt option 1: How has your classroom experiences prepared you for the internship? What do you wish you had learned prior to the internship?

Prior to this internship, I took several AP-level computer science classes where I primarily learned Java. While Java isn't directly applicable to the projects we're working on, those classes gave me a strong foundation in programming concepts. That foundation has allowed me to create a few personal projects, which also gave me some initial exposure to GitHub. This familiarity made it much easier to navigate GitHub more effectively during the internship. That said, I do wish I had more experience with web development languages like HTML, CSS, and JavaScript. I've faced some challenges with these while working on my final project. However, I recognize that struggling through new concepts is a natural and valuable part of the learning process.
