**Prompt option 3:** *What are some of the differences you've noticed between a school environment and a professional work environment?*

Throughout these first few days, there have been some apparent differences in setting between my school and a professional work space. The main difference is in overall mannerisms. In a school environment everything in general feels more casual and relaxed, while the workplace has more expectations and requirements to at least appear presentable on a surface level. This seeps down into social behaviors, in which professional settings involve conversations and interactions with a base level of respect and formality that is usually not seen in school.
