

Day 6 journal entry

Heerak Shah

Prompt option 3: Describe a challenge you encountered during your internship and how you approached overcoming it. What did you learn from this experience?

A challenge I encountered during my internship was when I couldn't change the color of my website to a gradient color and when I couldn't change the font of words on my website. I approached overcoming it by asking one of the people teaching the labs for help. He told me that I was missing a semicolon at the end of my line of code and that is how I fixed the font. For the gradient color I looked at different websites and asked AI for help. In the end I got a nice blue looking gradient mixed color. It looks good and I learned that many problems take a while to solve but if you persevere and keep on trying to find a solution instead of giving up things usually end up working in the end. I also learned to ask for help when I didn't know something instead of running around in circles trying to figure it out myself.
