Day 6 journal entry

[Anna Badulis]

Choose 1 of the following prompts to respond to and then delete the prompt(s) that you did not choose.

Prompt option 3: **Describe a challenge you encountered during your internship and how you approached overcoming it. What did you learn from this experience?**
A challenge I had during my internship was figuring out the basics of coding. As someone who has never learned any type of coding, it was quite difficult. I had to figure out where to put certain codes and how to create certain shapes and texts. How I approached it was to make sure to ask questions when I didn't understand something. I would ask whoever was teaching our skills labs for GitHub or just web development for more clarification on certain tasks and codes. If they weren't in the room, I would ask my fellow peers who were always willing to help.
