| *Prompt option 1:* **What is a topic that you found interesting this week? How do you plan to seek additional information and learn more about that topic?** |
| One topic that I found really interesting this week is the Web Devlopment and Github levels. I am interested in programming and computer science in general so these labs were really fun and informative for me. I plan to get additional information and learn more by adding new features on my website that we are creating for the final project. I am planning on researching different features and CSS skills that we might not have covered and that I could use to make my website look better and more polished. I also plan to ask more questions when we meet people who are in the software development and engineering roles at Red Hat. |
