Day 4 journal entry

[Ethan Lubomirski]

Choose 1 of the following prompts to respond to and then delete the prompt(s) that you did not choose.

Prompt option 1: **What is a topic that you found interesting this week? How do you plan to seek additional information and learn more about that topic?**
I think that the topic I found the most interesting this week was getting exposure to CSS and HTML. I was particularly interested in how these two languages both work together to create the structure and look of web pages. I plan to learn more information about this topic through self directed study/research of different coding resources. Also, I plan on implementing a good amount of Java Script as well to get myself more used to writing with it and to make my website look more interesting.

| *Prompt option 2:* **Discuss your interactions with various people during your internship and the value each relationship brings (peer interns, college mentor, session speakers, higher-level leaders).** |

Prompt option 3: **What are your main takeaways from this first half of your internship and how do you plan to carry those lessons into your second week?**
Add your response here

Export + contribute your reflection

1. Once you've filled out the above prompts, export this doc as a PDF. Note: make sure you rename the file to be in the format `[Firstname Lastname] Day 4 Journal Entry`

2. Now that you have a PDF of this week's reflections saved locally to your laptop, you should contribute the PDF to your personal GitHub dropbox area in <u>our shared repo</u>. Use the <u>'Journal entry contribution' cheat sheet here</u> to assist you and ask a GitHub coach for help if you need it!
