# Day 3 journal entry

Tyler Parker

*Prompt option 2:* **What is one new skill or piece of knowledge you've gained this week? How do you see yourself applying this in the future?**

This week I was  introduced to GitHub for the first time. Through the skills labs I've worked through, I've learned about GitHub's primary usage and taught  how it functions before modifying my own forked repository using VS Code. I've also been introduced to HTML and CSS for the first time, utilizing those languages to develop a basic "About Me" webpage. While all that covers very beginner-level content, I see these steps as the potential beginning of my future in the tech workforce, and hope to continue to increase my familiarity with these tools so that in said future, I will be able to utilize these resources with ease.
